CLOEMC V Meeting Dublin, SCSi Offices, July 14th, 2022.

Partners

A final CLOEMC V (pre-print) meeting was held in Dublin in July. The event was hosted by the Society of Chartered Surveyors Ireland and chaired by Pawel Novak, University of Warsaw. The SCSi are one of the primary members of the AEEBC whom are one of the partners for the project. Present at the meeting were Paweł Nowak, and Jerzy Rośłon both representing the Warsaw University of Technology, primary stakeholder in the project. Other parties involved are, Technische Universität Darmstadt, DE, Polish Association of Building Managers, PL, Universitat Politècnica de València, ES, Association of Building Surveyors and Construction Experts (AEEBC), Korporacja RADEX S.A., PL. Representing the SCSi was Shirley Coulter, CEO, Edward McCauley, Director of Practice & Policy, and Rob Patterson, SCSi and President of the AEEBC. Also, in attendance in Merrion Square and online were member stakeholders and members of the AEEBC. Martin Russell-Croucher attended as AEEBC Rep. The morning session started with a brief introduction of participants and a general update on the project as a whole. Further discussion followed on the date of publication and final production of CLOEMC V manuals.

The main aim of the CLOEMC V Project is to extend – with cross country co-operation, the Construction Managers Library by seven new manuals. The manuals, published in four languages (English, German, Polish and Spanish), will allow their implementation and use in different countries and in EU VET education systems.

The manuals are as follows: -

- M:26.** Mentoring And Coaching in Construction
- M:27.** Archaeological And Heritage Protection Aspects in Construction
- M:28.** Disruptive Innovation in Construction Management
- M:29.** Modern Circular Economy in Construction
- M:30.** Affordable Housing
- M:31.** Social Sustainability in Construction
- M:32.** Crisis Management - Covid – 19 in Construction

The manuals are additions to the Construction Managers Library, which contain 25 previous publications undertaken under CLOEMC I to CLOEMC IV. Please see attached list. CLOEMC V is complementary to the previous four CLOEMC projects. This project has been funded with support from the European Commission.

The Project objective is to make the education process comparable between EU countries and facilitate and help to recognise the educational route of construction managers, building experts and building surveyors from countries associated in the AEEBC. (Belgium, Denmark, Finland, France, Germany, Ireland, Italy, The Netherlands, Poland, Spain, Sweden, UK, <http://aeebc.org/>).

The afternoon session started with a presentation from the SCSl CEO, Shirley Coulter, outlining the Societies professional groups, ethos and general contribution/impact on the Irish construction sector.

Following this each manual contributor presented an update to the event attendees. All were received well and all participants contribution acknowledged.

Finally, it was agreed to make a final presentation at the next AEEBC GM to be held in Oct 22.

The Meeting then concluded.

CLOEMC I - Construction Managers Library.
